Microtel Inn & Suites

Albertville, AL (256) 894-4000

Sale Location:

Windy Hill Angus

5188 Horton Gap Road

Boaz, AL 35956

ANGUS MEDIA

Visit the *Angus Journal*® Web site, www.angusjournal.com, and view this sale book online. *References: American Angus Association*®, *AHIR*®, *AngusSource*®, *CAB*®, *Pathfinder*®. EPDs current as of September 14, 2016. Updated EPDs can be viewed online at www.angus.org.

Directions:

South of Boaz Hwy. 431, turn left toward Sardis City. North of Gadsden Hwy. 431, turn right toward Sardis City. Follow signs to sale site.

Herd Health:

All cattle will be accompanied by proper health certificates for immediate shipment. All possible carriers of AM, NH and CA will be tested.

Trucking:

Truckers believed to be reliable will be available to assist you in shipping your purchases.

Bull Information:

A supplemental sheet will be available sale day with complete weights and ultrasound information. Announcements from the auction block regarding cattle selling in this sale take precedence over information listed in this sale book.

Terms and Conditions:

Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf).

Food and Refreshments:

A complimentary lunch will be served at 11 A.M.

Buyers who are unable to attend the sale may send their bids to Jack Tate or the Auctioneer.

Liability:

All persons attending the sale and related functions do so at their own risk. Windy Hill Angus and the sale management and staff assume no liability, legal or otherwise, for any accident or injury that may occur.

Welcome

Welcome to our First Windy Hill Angus and Guests Bull Sale. We have been very busy preparing for our sale to ensure that everyone has a pleasant experience.

The past 16 years I have been ultrasounding for IMF, RE and Fat. This is a tool to improve our cattle. I use AI, embryo and bull tests to enhance our program. Last year we had the top two Angus bulls and they were the top two selling bulls over all (85 bulls) at the Florida Bull Test.

This sale would not be possible without our guest consignors and many friends who have helped to prepare for this event. Come and join us and have a complimentary lunch, meet new friends, and see old friends.

I hope everyone enjoys their day at Windy Hill Angus.

- BW 75, WW 710
- An outstanding young bull out of a first calf heifer, that is loaded with growth. From his EPDs to outstanding depth and muscle definition. We feel this could be as good a quality calf that we have ever raised. Notice the stacked pedigree with seven Pathfinders. A low birth to high yearling that should work and produce quality calves in any herd.

SAV Brilliance 8077 - Sire of Lots 13, 29 and 30.

Association Perspective

Low-birth-weight EPDs

Looking at a single trait on EPDs costs performance and money.

by David Gazda, regional manager, American Angus Association

One of the most common concerns I hear from commercial producers using Angus genetics is the size of calves at birth. Instinctively, my first thought is that the producers experienced calving problems due to the calves being too large at birth. However, the problem generally tends to be just the opposite, where the calves have been extremely small and light at birth, struggled to nurse and never caught up with their contemporaries from a growth standpoint.

Upon visiting with the producer and reviewing the bull's registration certificate and EPD profile, I usually discover a common theme – the producer had been selecting primarily for calving-ease, low-birth-weight-EPD bulls with no regard to any other traits. This is certainly understandable if the producer is breeding heifers and needs a certain level of calving ease delivered by low-birth-weight Angus bulls. Furthermore, in the southeast, like many other areas of the country where cow herds are relatively small, the herd bull may have to be multipurpose, breeding both heifers and mature cows with, again, emphasis being placed on calving ease.

At the risk of being controversial, many of these small calf scenarios could be eliminated if the producers would simply be willing to accept more birth weight, particularly when breeding mature cows. One only has to attend a production or test station sale to witness firsthand how the heavier-birth-weight-EPD bulls are penalized and therefore sell at a substantial discount. Have calving-ease and low-birth-weight EPDs been overemphasized to commercial producers? Maybe; maybe not.

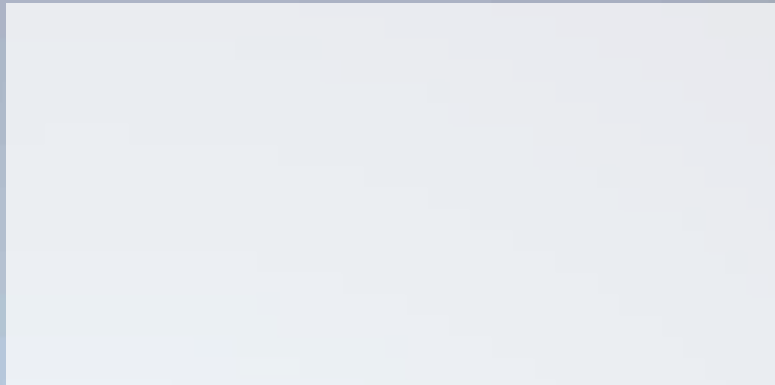

Regardless, the commercial producer equates Angus genetics with calving ease, fertility, maternal strength and carcass quality, and as seedstock producers we are challenged daily to deliver those genetics.

In closing, producers need to select bulls that allow them to reach their production goals; however, single-trait selection based upon an individual's birth weight EPD may needlessly sacrifice additional pounds at weaning. Next time you are in the market for a bull, don't discriminate against a little more birth weight EPD. You will still receive the calving ease you have always expected from Angus and a few extra dollars in your pocket at weaning!
